Apologies, I didn't recall you were missing the first day. Thanks for bringing it up.

Attached are the training and the training support materials from the Rocky Flats (RF) training I gave in Dec.

There are two main sources for Five-Year Review (5YR) info from EPA HQ. EPA's private side, OSRTI, has the guidance, the reports to congress, the guidance updates, and policy papers posted here: <https://www.epa.gov/superfund/writing-five-year-reviews-superfund-sites>, check the tabs to the right. The updates to the guidance for vapor intrusion, evaluating ICs, etc are at the bottom of the "writing FYRs" tab, along with the FAQs, which can be illuminating. There is one thing they are very excited about on this page [that doesn't apply to Federal Facilities](#), a new report format that replaces appendix E of the guidance.

The Federal folks at HQ, known as FFRRO, went through a data quality objectives (DQO) process to ask what was really important to put in the 5YR. They developed an interagency workgroup for improving and streamlining 5YRs which included DOE, DOD, and DOI. Consequently, a number of work products have been coming out with the buy-in of the other federal agencies which are meant to keep everybody from reinventing the wheel. These include community outreach tools and will include a writer's module which is very close to being announced. The workgroup tools can be found here: <https://www.epa.gov/fedfac/five-year-review-federal-facility-cleanups> under the training & tools tab along the top. EPA FF Policy documents for 5YRs can be found under the 3rd tab.

This interagency collaboration for FFs was important because FF are the only potentially responsible parties (PRPs) allowed to write their own 5YRs. Federal Facilities include 40% of the OUs on the NPL, so it's a large part of the universe. Writing the reports is the responsibility of the President under the law, and the President delegated to the other federal agencies to write all Superfund reports, under Executive order 12580 (a very old executive order).

Other favorite web links:

5YRs online <https://www.epa.gov/superfund/search-superfund-five-year-reviews>
RODs online <https://www.epa.gov/superfund/search-superfund-decision-documents>
RSL tables <https://www.epa.gov/risk/regional-screening-levels-rsls-generic-tables-may-2016>
5YR 2001 guidance document <https://semspub.epa.gov/work/HQ/128607.pdf>

Enough for now. Call if you have questions.

Subject: Rocky Flats FYR

Hello Pat,

I think we introduced ourselves briefly back in January, but I am Carl's new shadow at the Rocky Flats FYR meetings.

Quick question: would you please send me a copy of the FYR guidance presentation (if available) from the initial training?

Also, I am new to the CERCLA process and FYRs. If there are any documents you think would be helpful for me to read - apart from EPA's *Comprehensive FYR Guidance* - please let me know. Thank you.

With kind regards,

Lindsay Masters
